

Spaltentreue LaTeX-Ausgabe

Gleichung: $a/\sin(\alpha)=b/\sin(\beta)$

Zielvariable: α

Profil: **standard**

$$\frac{a}{\sin(\alpha)} = \frac{b}{\sin(\beta)}$$

$$a = \frac{b}{\sin(\beta)} \sin(\alpha)$$

$$\frac{\frac{a}{b}}{\sin(\beta)} = \sin(\alpha)$$

$$\operatorname{asin}\left(\frac{\frac{a}{b}}{\sin(\beta)}\right) = \alpha$$

Spaltentreue LaTeX-Ausgabe mit Spaltengrenzen

Spaltengrenzen: blau; Spaltenmitten: grau gepunktet; lokale Bruch-/Span-Achsen: rot

$$\frac{a}{\sin(\alpha)}$$

A diagram of a double-stranded DNA molecule. It consists of a central double helix structure. At each end of the helix, there is a single-stranded extension. The top extension is labeled '5'' and the bottom extension is labeled '3''.

$$\frac{b}{\sin(\beta)}$$

$$a = \frac{b}{\sin(\beta)} \sin(\alpha)$$

$$\frac{a}{b} = \sin(\beta)$$

$$=$$

$$\sin(\alpha)$$

$$\operatorname{asin}\left(\frac{\frac{a}{b}}{\sin(\beta)}\right)$$

$$=$$
