

Spaltentreue LaTeX-Ausgabe

Gleichung: $a/\sin(\alpha)=b/\sin(\beta)$

Zielvariable: α

Profil: **standard**

$$\frac{a}{\sin(\alpha)} = \frac{b}{\sin(\beta)}$$
$$a = \frac{b}{\sin(\beta)} \cdot \sin(\alpha)$$
$$\frac{a}{b} = \sin(\alpha)$$
$$\sin\left(\frac{\frac{a}{b}}{\sin(\beta)}\right) = \alpha$$

Spaltentreue LaTeX-Ausgabe mit Spaltengrenzen

Spaltengrenzen: blau; Spaltenmitten: grau gepunktet; lokale Bruch-/Span-Achsen: rot
